

PWS Information

Purpose of this worksheet: For water systems to document basic system information.

Facility Information

Water System Name:

Garberville Sanitary District

PWSID:	Population Served (number of people):	Number of Service Connections:	PWS Type:
1210008	913	460	<input checked="" type="checkbox"/> CWS <input type="checkbox"/> NTCWS

Mailing Address

Street or P.O. Box:

P.O. Box211

City or Town:	State:	Zip Code:
Garberville	Ca	95542

System Contact Person

Name:	Title:
Ralph Emerson	General Manager
Telephone:	Email:
(707)923-9566	remerson@garbervillesd.org

Person Who Prepared Inventory (if different from above)

Name:	Title/Affiliation:
Jennie Short	Capital Project Manager
Telephone:	Email:
(707)223-4567	jmshort@garbervillesd.org

Inventory Methodology

Enter Date Last Updated: 10/16/24

Purpose of this worksheet: For water systems to document the methods and resources they used to develop and update their inventory.

Part 1: Historical Records Review

Type of Record	Describe the Records Reviewed for Your Inventory
1. Construction Records and Plumbing Codes <i>Examples: Local ordinance adopting an international plumbing code. Permits for replacing lead service lines.</i>	IP 2000 Construction Plans, Kimtu Meadows Wateline Extension Project Plans, DWIP Construction Plans, Meadows Subdivision Construction Plans,
2. Water System Records <i>Examples: Capital improvement plans. Standard operating procedures. Engineering standards.</i>	Meter Replacement Operational Procedures,
3. Distribution System Inspections and Records <i>Examples: Distribution system maps. Tap cards. Service line repair/replacement records. Inspection records. Meter installation records.</i>	JUS and JUBS Meter Change Out Records and Service reports
4. Other Records	Annual Water Source Capacity Reports for development timelines

Part 2: Identifying Service Line Material During Normal Operations

1. During which normal operating activities are you collecting information on service line material? Check all that apply.

- | | |
|---|--|
| <input type="checkbox"/> Water meter reading | <input type="checkbox"/> Water main repair or replacement |
| <input type="checkbox"/> Water meter repair or replacement | <input type="checkbox"/> Backflow prevention device inspection |
| <input type="checkbox"/> Service line repair or replacement | <input type="checkbox"/> Other |

If "Other", please explain:

2. Did you develop or revise standard operating procedures to collect service line material information during normal operation? No

If "Yes", please describe:

Part 3: Service Line Investigations

1. Identify the service line investigation methods your system used to prepare the inventory (check all that apply).

- | | |
|--|--|
| <input type="checkbox"/> Visual Inspection | <input type="checkbox"/> Water Quality Sampling - Other |
| <input type="checkbox"/> Customer Self-Identification | <input type="checkbox"/> Predictive Models or Statistical Analysis |
| <input type="checkbox"/> Pipe Dating | <input type="checkbox"/> Interpolation |
| <input type="checkbox"/> Pipe Diameter | <input type="checkbox"/> Interviews |
| <input type="checkbox"/> Water Quality Sampling - Targeted | <input type="checkbox"/> Emerging Methods |
| <input type="checkbox"/> Water Quality Sampling - Flushed | <input type="checkbox"/> Other |
| <input type="checkbox"/> Water Quality Sampling - Sequential | |

If "Other" or "Emerging Methods," please explain:

None

2. If "Predictive Modeling" or "Interpolation," please briefly describe the model and inputs used.

None

3. How did you prioritize locations for service line materials investigations? For example, did you consider environmental justice and/or sensitive populations, did you use predictive modeling, and/or did you target areas with high number of unknowns?

No investigations

Detailed Inventory

Date Last Updated:

Purpose of this worksheet: To provide a template for water systems to track materials for each service line in their distribution system.

General Instructions: Each row in this worksheet represents one service line connecting the water main to the customer's plumbing. The columns with the aqua shading are required for the Inventory Summary tab. Note that users can freeze panes to enable them to see the headings and notes when entering data. The worksheet includes example rows and is formatted for approximately 10,000 entries. Please refer to the red triangle in the upper corner for additional instructions.

Error Count:
Rows Missing Information:

Location Information			System-Owned Portion										Customer-Owned Portion						Entire Service Line Material Classification (If Letter or Missing Information appears, ensure all required columns are filled correctly. See instructions.)

Inventory Summary

Enter Date Last Updated: 10/16/24

Purpose of this worksheet: For water systems to provide a summary of their service line inventory, including information on ownership, inventory format, and the number of service lines for each of the four required materials classifications.

Note that water systems may submit their completed LCRR initial inventories before October 16, 2024. Pursuant to 40 CFR 141.85(e), water systems must provide public notification to customers served by lead, galvanized requiring replacement, and/or lead status unknown service lines within 30 days after DDW's approval of the completed inventory. DDW will notify water systems by email when their inventory submission is approved.

Part 1. General Information

1. Is this the Initial Inventory or an Inventory Update ?	Select One
2. Who owns the service lines in your system? <i>If other, please explain below.</i>	Ownership is split, meaning that the system owns and portion and the customer owns a portion
3. When were lead service lines banned in your system? Reference the state or local ordinance that banned the use of lead in your system.	
4. Do you have lead goosenecks, pigtails or connectors in your system?	Select "Yes" or "No" or "Don't Know"

Part 2. Inventory Format

Describe your inventory format in the space provided below (e.g. , the **Detailed Inventory** worksheet, custom spreadsheet, GIS map). Provide the filename and/or web address if applicable.

Part 3. Inventory Summary Table ¹

If you are using the **Detailed Inventory** worksheet, the classifications you select in the Column "Entire Service Line Material Classification" will be used to calculate the total number of service lines for each of the four material classifications below. Otherwise, enter the number of service lines blue- and aqua colored-cells.

Table 3.1. Inventory Summary by Ownership

Service Line Material Classification	Number of Water System Owned Service Lines	Number of Customer Owned Service Lines
Lead	0	0
Galvanized	0	0
Galvanized Requiring Replacement	0	0
Non-Lead - Copper	0	0
Non-Lead - Plastic	0	0
Non-Lead - Other	326	326
Unknown	130	130
TOTAL	456	456

Inventory Summary

Table 3.2. Inventory Summary Total

Service Line Material Classification	Definition	Total
Lead	Any portion of the service line is known to be made of lead.	0
Galvanized Requiring Replacement (GRR)	The service line is not made of lead, but a portion is galvanized and the system is unable to demonstrate that the galvanized line was never downstream of a lead service line.	0
Non-Lead	All portions of the service line are known NOT to be lead or GRR through an evidence-based record, method, or technique.	326
Lead Status Unknown	The service line material is not known to be lead, GRR, or non-lead line. For the entire service line or a portion of it (in cases of split ownership), there is no evidence to support material classification.	130
Lead Gooseneck/Fitting	A short section of piping, typically not exceeding two feet, which can be bent and used for connections between rigid service piping.	0
Total Number of Service Lines		456

Notes

This summary table is for reporting material for the entire service line connecting the water main to the customer's plumbing. See the Section 4 of the Inventory Instructions or Exhibit 2-2 of U.S. EPA's Guidance for Developing and Maintaining a Service Line Inventory (US EPA, 2022).

Public Accessibility Documentation

Enter Date Last Updated:

10/16/24

Purpose of this worksheet: For systems to provide documentation to states on how they met the public accessibility requirements of the LCRR.

1. Select the location identifiers that you use for your service line inventory. Check all that apply.

- Address
- Street
- Block
- Intersection
- Landmark
- GPS Coordinates
- Other

If "Other", please describe:

Assessor's Parcel Number

2. Does **every service line** have a location identifier?

Yes

If "No", explain. Remember that location identifiers are required for service lines that are lead and galvanized requiring replacement.

3. How are you making your inventory publicly accessible? Check all that apply. Remember that if your system serves > 50,000 people, you **must** provide the inventory online.

- Interactive online map
- Static online map
- Online spreadsheet
- Printed service line map
- Printed tabular data
- Information on water utility mailings or newsletter
- Hard copy information available in water system office
- Other

If "Other", please describe:

Please note once the report is submitted, you cannot return to make edits.
If corrections are needed, please contact DDW staff at DDW-LSLReports@waterboards.ca.gov so we may review and re-open the submission for editing.

You, **Jennie Short**, are about to submit the Lead and Copper Rule Revisions (LCRR) initial lead service line inventory for **GARBERVILLE SANITARY DISTRICT** to the State Water Resources Control Board Division of Drinking Water. U.S. EPA requires that all community and non-transient non-community water systems submit an inventory that identifies all service lines that connect to the water system's distribution system, regardless of ownership status, by October 16, 2024.

I hereby certify that, to the best of my knowledge, the provided information is true and accurate.

Submit

Thank you for submitting your initial lead service line inventory.
